openGym

BRAND GUIDE · NOVEMBER 2026

Your workouts. Your weights. Your data.

How openGym looks, sounds and moves. Logos, colours, type, icons and banners to download at opengym.ch/brand

THE BRAND

A gym tracker that respects you.

openGym is a free, open-source gym and body-weight tracker for iPhone, Android, Apple Watch, Wear OS and Garmin. No subscription, no account needed, no telemetry. The brand says the same thing: honest, calm, strong.

Three words

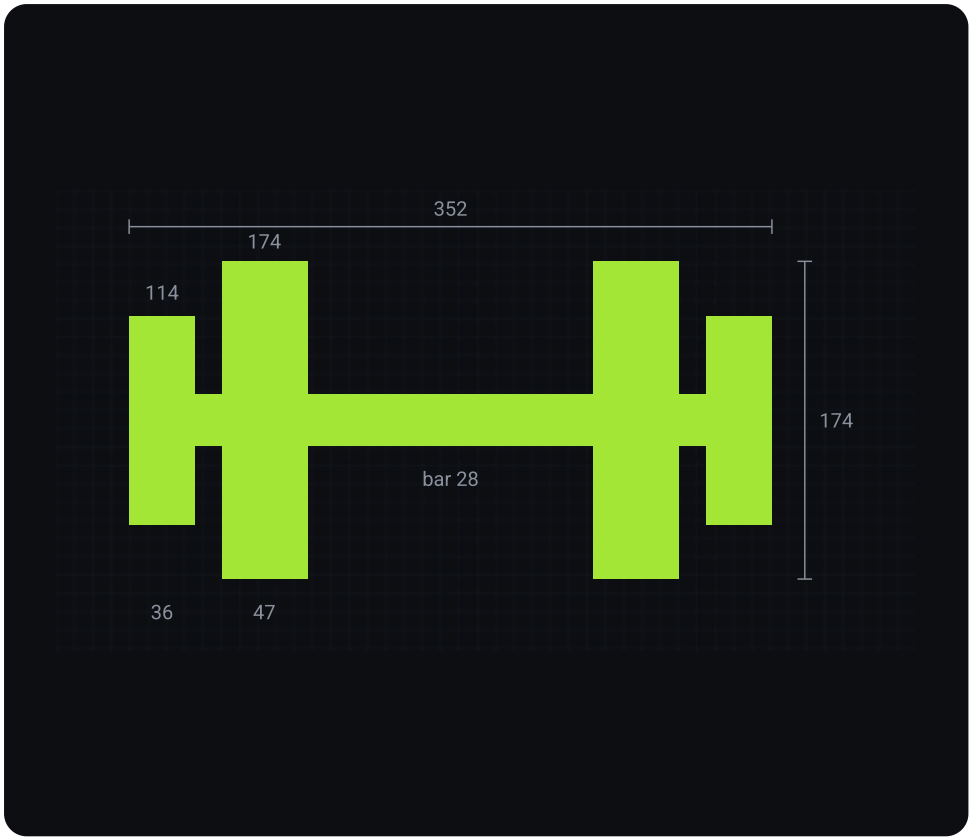

Honest	We say what the app does and what it does not. No dark patterns, no fake urgency.
Strong	Heavy shapes, one loud colour, big numbers. Built for a sweaty hand between two sets.
Calm	Dark surfaces, lots of space, nothing that moves without a reason.

The pieces

ELEMENT	WHAT IT IS
Mark	A barbell from five plain rectangles. Square corners, never rounded.
Wordmark	open + **Gym**, bold. Spelled **openGym**: lower-case o, capital G, one word.
Colour	One green, **openGym green #A3E635**, on ink #0C0E12.
Type	Liberation Sans Bold in the logo only. The system font everywhere else.
Voice	Human, short, a little witty.

LOGO

The mark

Five rectangles on a 352 × 174 grid: a full-width bar (352 × 28), two outer plates (36 × 114) and two inner plates (47 × 174). Everything is centred on the bar. Corners are square.

The mark stands for the barbell, the one thing every gym has. It is drawn from these numbers and nothing else: never redraw it, never add collars, handles or rounded plates.

Where the mark is used alone

App icons, watch faces and complications, notification icons, favicons, social avatars. Anywhere there is no room for the word.

LOGO

The logo, its space and its smallest size

The dashed line is the logo; the dark area around it is its clear space.

Proportions	Mark height 1.07 × the type size, 0.2 × the type size away from the word. The mark's centre sits 0.36 × the type size above the baseline.
Clear space	Half the height of the mark on every side. Nothing else goes inside it.
Smallest size	Logo: 120 px or 30 mm wide. Mark alone: 16 px or 6 mm wide.
Wordmark	Liberation Sans Bold, 700, letter spacing -0.036 em. Use the files, which have the letters as outlines. Never type the logo out in another font.

LOGO

Versions

Logo on dark · The default. Ink background, light "open".

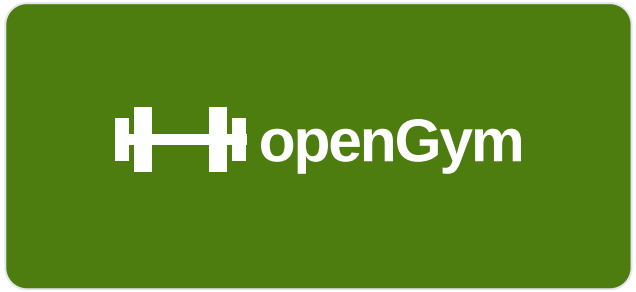

Logo on light · White background, dark "open". Keep the green "Gym".

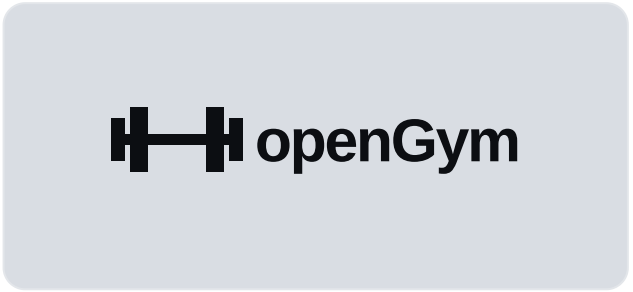

Transparent, for dark · For your own dark backgrounds.

Transparent, for light · For your own light backgrounds.

All white · One-colour printing, photos with a dark badge, coloured backgrounds.

All black · One-colour printing on light paper, engraving, stamps.

COLOUR

One green. Lots of dark.

openGym green
#A3E635 · RGB 163 230 53

Ink
#0C0E12 · RGB 12 14 18

Light
#EEF1F6 · RGB 238 241 246

Dark text
#12151B · RGB 18 21 27

Green on light
#4D7C0F

Surface
#1B1F26

Muted
#8B919C

White
#FFFFFF

PAIR	CONTRAST	USE
Green on ink	12.8 : 1	Buttons, highlights, the word Gym, charts. Text on a green button is ink, never white.
Light on ink	17.1 : 1	Body text on dark.
Green #4D7C0F on white	5.0 : 1	Green text and links on light backgrounds. #A3E635 on white is only 1.5 : 1, so use it there for shapes, never for text.
Muted on ink	6.1 : 1	Secondary text, captions.

Roughly 70 % ink, 20 % light and grey, 10 % green. Green is a signal: if everything is green, nothing is. In the app people may pick their own accent colour; the logo always stays openGym green.

TYPE

Big numbers, short words.

100 kg × 5

Your data stays on your phone.

Plan, log and track your training. Body text is regular, 15 to 17 px on screens, with room to breathe.

Caption · Muted · 12 to 13 px

Logo	Liberation Sans Bold, as outlines in the files. Only for the wordmark.
Everything else	The device's own font: SF Pro on Apple, Roboto on Android, Segoe UI on Windows. On graphics: Roboto.
Headings	Bold 700, letter spacing -0.03 to -0.04 em, tight line height (1.0 to 1.1). Few sizes, big steps between them.
Numbers	Tabular figures for weights, reps and timers, so they don't jump while they change.
Case	Sentence case everywhere. No ALL CAPS headlines, small spaced caps only for little labels.

APP ICON

The icon

40 mm 24 mm 14 mm 8 mm

The mark in openGym green on ink, centred, nothing else. The stores and the phone round the corners themselves, so the master file is square (opengym-icon-square). The rounded version is for places that show it as it is, like websites and slides.

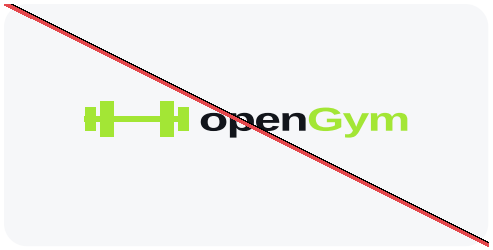

Alternate app icons in the app (other colours) are the user's choice. Everywhere else, use this one.

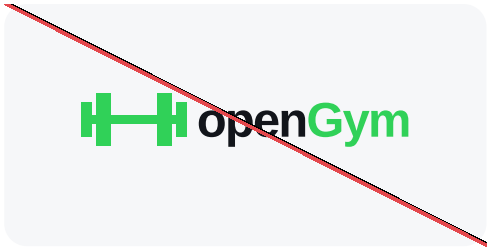

Watch and notification icons: the mark alone, white or green, on clear.

LOGO

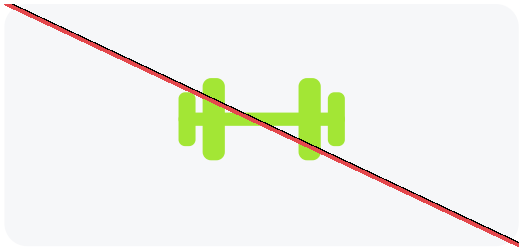

Please don't

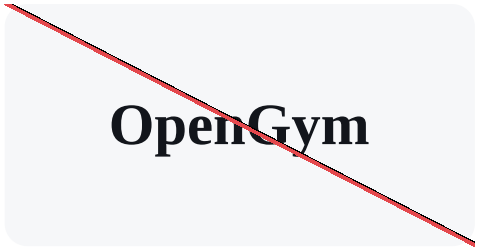

Stretch or squash it

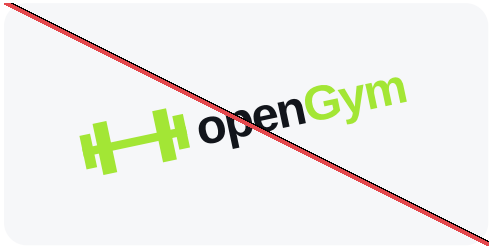

Use another green

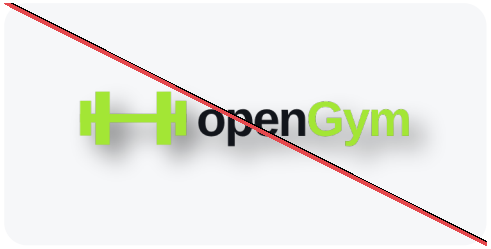

Round the corners

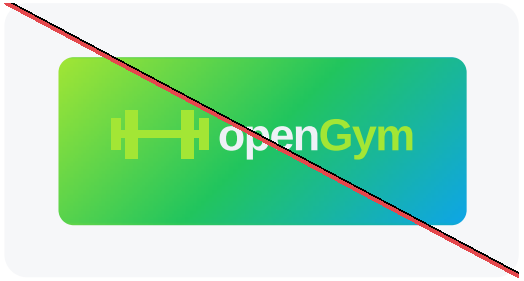

Retype it, change the spelling

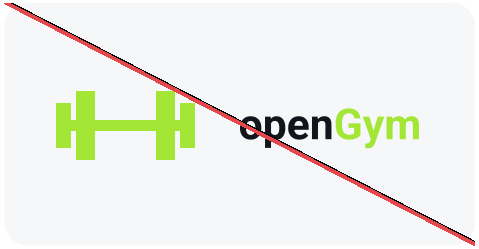

Rotate it

Add shadows, glows or outlines

Put it on busy or colourful backgrounds

Change the spacing or the mark size

On photos and colourful backgrounds, put the logo on an ink badge (a rounded #0C0E12 pill) instead.

DESIGN

How openGym feels

AREA	INSPIRED BY	WHAT IT MEANS FOR US
Minimalism	Muji	One accent colour, no decoration without a job. If it can go, it goes.
Typography	Pentagram	Few sizes, strong headline scale, tight letter spacing, big confident numbers.
Interface	Linear	Dark, precise, thin lines, calm surfaces, fast. Keyboard and one-hand friendly.
Motion	Apple	Soft spring motion that explains where things come from. Everything respects "reduce motion".
Micro-interactions	Framer	Buttons, chips and toggles react on press within 100 ms. Small, quick, never in the way.
Onboarding	Duolingo	Three friendly steps to the first workout. Ask only what's needed, celebrate the first set.
Search and filters	Airbnb	Filter chips on top, a live result count, results change as you tap.
Dashboards and docs	Notion	Clean side navigation, readable blocks, everything findable.
Landing pages	Stripe	A clear story from top to bottom, the product shown big, generous space.
Performance	(ours)	Fast and light on the battery: no needless animation loops, no tracking scripts, images sized for the screen.

Inspiration means principles, not copying anyone's look. openGym always looks like openGym.

VOICE

Talk like a good training partner.

Human	Short sentences, plain words, "you" and "we".
A little witty	A wink, not a stand-up show. Never at the user's expense.
Honest	Say what it does. No "revolutionary", no fake urgency.
Spelling	openGym, always. No em dashes in app texts or posts: use a full stop, a comma or a colon.

Like this

Heavier than ever. No pressure.

Every rep last time. 5 kg more.

Your data stays on your phone.
